An Equal Opportunity Employer

Indiana's non-seasonally adjusted unemployment rate for May is 4.8 percent, seven-tenths of a percentage point below the national rate of 5.5 percent, Craig E. Hartzer, Commissioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during May 2002 was 2,983,800.

Indiana's May unemployment rate was lower than Illinois, 6.0 percent; Michigan, 5.9 percent; Ohio at 5.4 percent; and Kentucky, 5.1 percent.

"Increased job growth in all sectors allowed Indiana's unemployment rate to slip below 5.0 percent during the month of May for the first time since November of 2001," commented Hartzer.

The monthly survey of 7,500 Hoosier employers reports payroll employment at 2,928,600, a decrease of 45,300 from one year ago and 19,800 more than last month. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 620,600 in May, a decrease of 27,400 from last year. Motor vehicle manufacturing accounts for 91,500 jobs, 1,800 less than one year ago. Manufacturing of motor vehicle parts totals 60,500. Industrial machinery manufacturing in May accounts for 63,900 Hoosier jobs, 100 less than April.

Construction employment totals 145,000 an increase of 7,700 from last month. Of that, heavy construction reports 18,000 jobs, an increase of 100 from last year.

Service producing employment totals 2,156,000 in May, 12,700 less than last year. Transportation and public utilities total 142,900, 800 more than April.

(over)

Retail trade totals 551,600, 5,400 less than a year ago. Of that, general merchandise stores report employment of 78,500, or 1,700 less than last year. Service sector employment, such as business services, computer and data processing, totals 758,800 in May, which is 3,600 less than the previous year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,135,100 in May 2002.

An estimated 2,983,800 Hoosiers are employed and 151,300 are unemployed.

Indiana's labor force for May 2001 totaled 3,117,900. Hoosiers employed one year ago is estimated at 2,996,700, and May 2001 unemployed in Indiana totaled 121,200. Indiana's estimated unemployment rate one year ago was 3.9 percent, compared with the national unemployment rate of 4.1 percent in May 2001.*

*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion. More detailed information can be found at <http://stats.bls.gov/launews1.htm>.
